The natural magic of butterflies and flowers abounds in 23 realistic illustrations, including a tiger swallowtail amid pansies, a snout butterfly sampling the goldenrod, a great spangled fritillary at ease among some coreopsis, plus twenty other varieties of lepidoptera! Colorists of all ages can paint or color these portraits, which feature beautiful drawings, specially printed with light gray lines that virtually disappear with the addition of colors for a finished, professional look; high-quality paper, printed on one side only and suitable for watercolor, colored pencils, and other media; and perforated pages for easy removal from the book.
