José Luis Escobar Fernández
El juego patológico es un trastorno mental de difícil abordaje terapéutico. Constituye un importante problema de salud pública y puede llegar a tener graves consecuencias perjudiciales, de muy distinta índole, tanto para la persona afectada como para sus allegados. Desde su consideración inicial como entidad nosológica en el DSM-III, los avances en Neurociencia sugieren la necesidad de una reconceptualización. En consonancia con dichos avances, existen líneas de investigación clínica con resultados limitados aunque prometedores en la búsqueda de tratamientos psicofarmacológicos que complementen el abordaje integral de este trastorno.
