Algebra in the Early Grades (Studies in Mathematical Thinking and Learning Series)

Algebra in the Early Grades (Studies in Mathematical Thinking and Learning Series)

This volume is the first to offer a comprehensive, research-based, multi-faceted look at issues in early algebra. In recent years, the National Council for Teachers of Mathematics has recommended that algebra become a strand flowing throughout the K-12 curriculum, and the 2003 RAND Mathematics Study Panel has recommended that algebra be “the initial topical choice for focused and coordinated research and development [in K-12 mathematics].”

This book provides a rationale for a stronger and more sustained approach to algebra in school, as well as concrete examples of how algebraic reasoning may be developed in the early grades. It is organized around three themes:

- The Nature of Early Algebra
- Students’ Capacity for Algebraic Thinking
- Issues of Implementation: Taking Early Algebra to the Classrooms.

The contributors to this landmark volume have been at the forefront of an effort to integrate algebra into the existing early grades mathematics curriculum. They include scholars who have been developing the conceptual foundations for such changes as well as researchers and developers who have led empirical investigations in school settings.

Algebra in the Early Grades aims to bridge the worlds of research, practice, design, and theory for educators, researchers, students, policy makers, and curriculum developers in mathematics education.

From reader reviews:

Sarah Alexander:

Now a day people that Living in the era wherever everything reachable by talk with the internet and the resources in it can be true or not need people to be aware of each details they get. How many people to be smart in receiving any information nowadays? Of course the reply is reading a book. Reading through a book can help folks out of this uncertainty Information mainly this Algebra in the Early Grades (Studies in Mathematical Thinking and Learning Series) book since this book offers you rich information and knowledge. Of course the info in this book hundred percent guarantees there is no doubt in it everbody knows.

Audrey Patton:

Hey guys, do you wants to finds a new book to learn? May be the book with the subject Algebra in the Early Grades (Studies in Mathematical Thinking and Learning Series) suitable to you? Often the book was written by famous writer in this era. Typically the book untitled Algebra in the Early Grades (Studies in Mathematical Thinking and Learning Series)is the one of several books that will everyone read now. This specific book was inspired a lot of people in the world. When you read this reserve you will enter the new way of measuring that you ever know ahead of. The author explained their thought in the simple way, consequently all of people can easily to understand the core of this book. This book will give you a large amount of information about this world now. So that you can see the represented of the world in this particular book.

Ann Conley:

Playing with family inside a park, coming to see the marine world or hanging out with close friends is thing that usually you have done when you have spare time, subsequently why you don't try factor that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Algebra in the Early Grades (Studies in Mathematical Thinking and Learning Series), it is possible to enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't obtain it, oh come on its referred to as reading friends.

Cynthia Harvell:

Reading a book to be new life style in this yr; every people loves to read a book. When you learn a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, such us novel, comics, as well as soon. The Algebra in the Early Grades (Studies in Mathematical Thinking and Learning Series) provide you with a new experience in examining a

book.
