**True Physics of Light Beyond Relativity: Quantum Gravity and the Cosmic Multiverse** Shailesh Kadakia
This book is about the true science of light. Many physicists from the beginning of time have failed to recognize the exact nature of light as it relates to different events, either occurring naturally or created by human efforts. In this second edition of the book, we have revealed astonishing details of the creation of radiation waves by applying quantum particle electron theory developed by Max Planck. Our work extends the ideas suggested by the Portuguese physicist, Joao Magueijo, and proves his ideas of the varying speed of light (VSL) to be correct. We have provided answers to many questions about the creation of the solar system and the universe that were not answered by previous creation theories, such as the big bang. Our theory of relativity, postulated by Mr. Kadakia and designated skylativity, comes from a simplification of many computations related to the sky and the universe, and presents the results with higher accuracy than before.
