Agile Systems With Reusable Patterns of Business Knowledge: A Component-Based Approach (Artech House Computing Library) Amit Mitra, Amar Gupta
Driven by the need for global excellence and customer value, agility and innovation have become imperative for business. However, most business process engineering and information system approaches address only operational efficiency and economics. This unique book closes this gap. It shows professionals how innovation can be systematized with patterns of information. The book explains how business processes and information systems can be tightly aligned and how they can be developed to automatically adapt to change. This practical resource helps practitioners design business processes and systems that are both agile and adaptable, coordinate integration of information across supply chains, reduce time-to-market, and improve computer aided systems engineering tools.
