Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence)

Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence)

The objective of this book is to contribute to the development of the intelligent information and database systems with the essentials of current knowledge, experience and know-how.

The book contains a selection of 40 chapters based on original research presented as posters during the 8th Asian Conference on Intelligent Information and Database Systems (ACIIDS 2016) held on 14–16 March 2016 in Da Nang, Vietnam. The papers to some extent reflect the achievements of scientific teams from 17 countries in five continents.

The volume is divided into six parts: (a) Computational Intelligence in Data Mining and Machine Learning, (b) Ontologies, Social Networks and Recommendation Systems, (c) Web Services, Cloud Computing, Security and Intelligent Internet Systems, (d) Knowledge Management and Language Processing, (e) Image, Video, Motion Analysis and Recognition, and (f) Advanced Computing Applications and Technologies.

The book is an excellent resource for researchers, those working in artificial intelligence, multimedia, networks and big data technologies, as well as for students interested in computer science and other related fields.

From reader reviews:

Mark Logan:

You can spend your free time to read this book this guide. This Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) is simple to create you can read it in the area, in the beach, train and also soon. If you did not get much space to bring the printed book, you can buy the actual e-book. It is make you easier to read it. You can save often the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

James Vazquez:

Don't be worry when you are afraid that this book may filled the space in your house, you can have it in e-book means, more simple and reachable. This particular Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) can give you a lot of good friends because by you considering this one book you have factor that they don't and make you more like an interesting person. This book can be one of a step for you to get success. This guide offer you information that probably your friend doesn't realize, by knowing more than various other make you to be great men and women. So , why hesitate? Let us have Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence).

Laura Burke:

That reserve can make you to feel relax. This book Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) was colorful and of course has pictures on the website. As we know that book Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) has many kinds or category. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore , not at all of book tend to be make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading in which.

Anne Simons:

As a pupil exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some guide, they are complained. Just tiny students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Recent Developments in Intelligent Information and Database Systems (Studies in Computational Intelligence) can make you experience more interested to read.
