**Note to Institutional Buyers**: Purchase of the Institutional Version of this product allows **Acland's DVD Atlas** to be installed on a computer(s) within an institution.

The second DVD in this remarkable and beautifully produced DVD anatomy atlas explores the fundamental structures of the Lower Extremity. DVD 2 consists of four sections, describing:

- The Hip
- The Knee
- The Leg and Ankle
- The Foot

These DVDs show you true images of real, exquisitely dissected human anatomical specimens, in three dimensions. As the camera moves from one viewpoint to another, the specimen appears to rotate in space, letting the viewer experience it as a three-dimensional object. **Acland's DVD Atlas** uses fresh, un-embalmed specimens that retain the color, texture, mobility—and beauty—of the living human body.

A concise synchronized narration runs throughout the program. As each new structure is shown, its name appears on the screen. There is a self-testing feature at the end of each section. Specific content can be accessed through detailed searches of the index and table of contents.

For students, **Acland's DVD Atlas** is a time-saving aid to first-time learning, an effective way to relearn anatomy for clinical rotations, and a time-efficient tool for review. For clinicians in training and in practice, it assures a swift renewal of anatomic knowledge. For teachers, **Acland's DVD Atlas** shortens the time needed to provide immediate, satisfying explanations of three-dimensional structure.
